

# LANDAUER Reduces Focus on Therapy Physics, Retires microSTARii® Medical Dosimetry System, nanoDot™

Streamlining offerings will enable LANDAUER to accelerate innovation in core areas of expertise

Following the recent divestiture of its therapy physics businesses, LANDAUER continues to reduce its focus on therapy physics with the retirement of the microSTARii Medical Dosimetry System and the nanoDot products. This decision is intended to further align the company's product portfolio with its strategy to be the leader in occupational dosimetry products and related services, such as radiation safety services.

"We are excited about how these changes will help us accelerate our innovation efforts," says Walter Hock, President of Fluke Health Solutions. "By focusing on our core applications, we will be better positioned to drive success for current and future LANDAUER customers."

The microSTARii Medical Dosimetry System and nanoDot products are no longer available for purchase. LANDAUER remains committed to its customers through these changes. Please contact LANDAUER at 800-323-8830 for additional information.

## **About LANDAUER**

LANDAUER, a Fortive company and division of Fluke Health Solutions, is a global leader in occupational dosimetry and radiation compliance solutions. For nearly 70 years, the company has provided dosimetry services and health physics support to hospitals, medical clinics, universities, national laboratories, nuclear facilities, and other industries in which ionizing radiation poses a potential risk to employees.
