Patents

US Patent #5,892,234: McKeever SWS, Akselrod MS, Markey BG. Method for determining an unknown absorbed dose of radiation using optically stimulated luminescence. April 6, 1999.

US Patent #5,962,857: McKeever SWS, Akselrod MS, Markey BG. Method for the fast determination of an unknown absorbed dose of radiation with high sensitivity using optically stimulated luminescence. October 5, 1999.

US Patent #6,316,782: Akselrod MS, McKeever SWS. System and method for the detection of abnormal radiation exposures using pulsed optically stimulated luminescence. November 13, 2001.

US Patent #6,414,324: Colyott LE, Akselrod MS, McKeever SWS. Method of preparing detection materials for use in UV detection using phototransferred thermoluminescence. July 2, 2002.
