

## Remote Radiation Safety Compliance Consulting & Dosimetry Support

**Operate a top-tier radiation protection program with tailored guidance from our remote team of radiation safety experts.**

LANDAUER's Radiation Safety Support (RSS) service is a customizable program designed to take the stress out of maintaining your radiation protection program. This service gives radiation safety personnel access to advantageous resources and a team of coveted industry experts with decades of combined radiation safety experience. Meant to support an existing RSO and radiation safety team, RSS is an excellent adjunct to any dosimetry program.

### **Created for Radiation Safety Personnel by an RSO**

RSS provides time-saving assistance helping to improve your organization's safety response. Created by a current Radiation Safety Officer (RSO) who knows exactly what daily pressures and experiences come with the job, this service is customized for you based on your unique program. Some of the areas RSS can assist with include:

#### **DOSIMETRY MANAGEMENT**

- Review dose reports
- Manage as low as reasonably achievable (ALARA) Memos
- Prepare customized quarterly executive summaries
- Provide electronic signoffs for reports

#### **REGULATORY COMPLIANCE ASSISTANCE**

- Review existing policies and procedures and propose updates
- Suggest mandated changes
- On-demand consultation for incidents and inspections
- Monitor state and Nuclear Regulatory Commission (NRC) requirements
- Communicate with agencies on behalf of your organization
- Prepare radioactive material license (RML) amendments and assist with license renewals and applications

“Definitely contract with LANDAUER for whatever you need. Adding the extra help got all of our needs met. It's perfect for us!”

Shondra Murley  
*Nuclear Medicine Manager  
and Assistant RSO  
West Tennessee Healthcare*

## Why use RSS?

Our customers turn to us when they find themselves needing a helping hand managing their dosimetry program. Some of the most common reasons for utilizing our RSS team include:

- RSO is managing a large program and needs assistance to handle administrative tasks
- RSO has primary job duties outside of managing dosimetry and needs someone to manage the program for them
- A recent inspection has uncovered opportunities for improvement and guidance is needed
- Changes have occurred such as new equipment, staffing changes, new locations, increase in demand, or updates to regulations

No matter your reason, we are here to provide support when you need it!

## Why Choose LANDAUER?

LANDAUER has been offering radiation safety services and solutions for over 70 years. We have experience working with organizations and inspectors at the state, federal, and international level and are widely recognized as the gold-standard in dosimetry.

We know how important it is to have a bulletproof radiation protection program, but not every radiation safety professional is an expert in this field. RSS provides that expertise without needing to hire additional staff. That, in turn, helps provide a cost-efficient solution: access to some of the best professionals in the industry without the added cost of hiring.

*"Bringing in LANDAUER RSS made perfect sense for us. It's been a safety net for us to have their expertise just a phone call or email away, and it's saved us quite a bit of money. They are phenomenal!"*
