

RadViewer for RadWatch® Readings

Manage your responders RadWatch dosimeter assignments easily

Accurate measurements of radiation exposure can quickly bring clarity to an urgent event, allowing first responders to manage the event efficiently.

With the RadViewer, you will know the responder's dose reading prior to an event and during radiological incidents.

These handheld RadViewers offer RadWatch program management capabilities:

- Works exclusively with the LANDAUER RadWatch dosimeters
- Establishes chain of custody between the RadWatch dosimeter serial number to the name of the responder it was issued to

Interchangeable battery via standard USB cable

RadViewers Data Management Software:

- Utilizes an Apple iPod Touch as the primary user interface
- Stores the RadWatch dosimeter assignment and the last dose reading that was assigned to the dosimeter
- Shows RadWatch dosimeter history - all scanned information by dosimeter serial number
