

## Do you know if your state requires a radiation shielding design?

Sample Shielding Room Design

### LANDAUER Medical Physicists are experts in all practice types and modalities including:

- Radiography
- Fluoroscopy
- Cone beam CT
- Computed tomography (CT)
- Mammography
- Nuclear medicine, including hot labs, PET CT and SPECT

Over 35 states now require shielding designs when installing new or moving existing radiation-emitting equipment – or building a new facility.

Let LANDAUER Medical Physicists assist you in all stages from planning to preparation and filing with the appropriate regulatory agency, if needed.

All calculations and recommendations are completed in accordance with the National Council on Radiation Protection and Measurements (NCRP) reports, applicable state regulations and As Low As Reasonably Achievable (ALARA) guidelines.

### You can trust the LANDAUER team dedicated to Shielding Design and Radiation Protection Programs:

- We perform more than 2,000 shielding designs annually ranging from multi-equipment installations to single dental/medical practices
- Our physicists provide shielding designs in all states
- We produce clear and concise reports that are state-specific and useful to medical practitioners, contractors and others

And if desired, you can get a 1-3 day turnaround!

### LANDAUER also offers complete Radiation Protection Programs. Learn more on back side...
